RETURN POSTAGE GUARANTEED

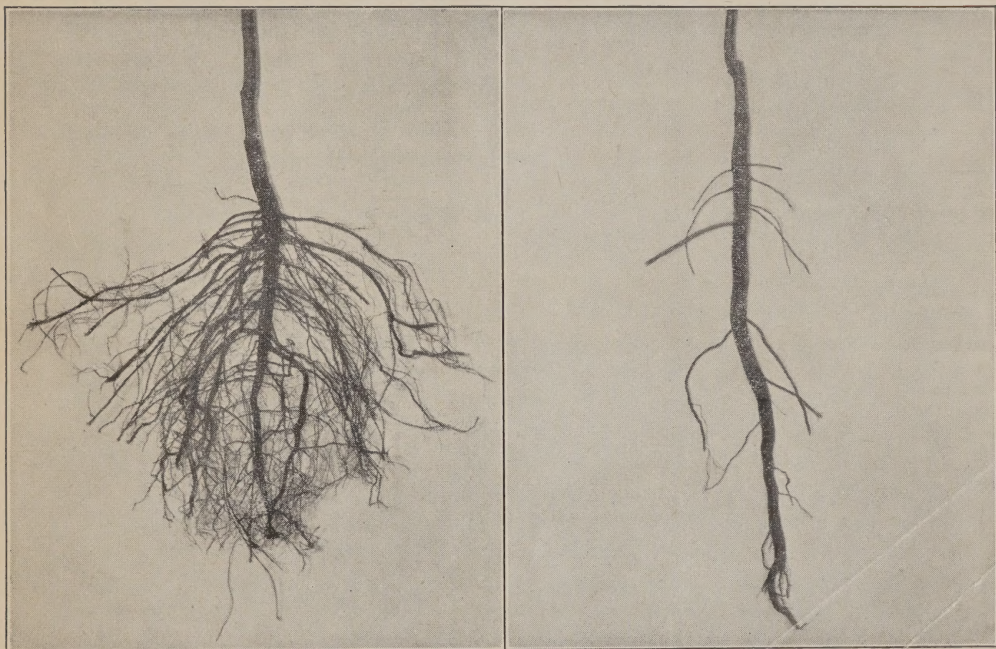

We guarantee all stock you purchase from us to be high-grade first class in every respect. We guarantee every tree to be true to name; if it proves otherwise, we will replace free or refund the amount you paid us for it. Our stock is carefully handled and should be in good, living and growing condition upon arrival. If for any reason it is not entirely satisfactory, return it at once and we will replace it free or refund your money. We want you to be satisfied, not only when you get our stock, but also afterwards. When our fruit trees bear, when our roses bloom, we want you to be happy that you bought them.

In the comfort and privacy of your own home, look through this catalogue and select just what you want. There is an order blank for your convenience. In making out your order, please write or print your name and complete address plainly, giving street or rural route. Also, giving your express office if different from your address. Order by mail and save your gas. It is so easy. You may send us a check, draft, or money order. We receive your order and fill it according to your instructions. If you are not sure of the varieties that are best suited to your locality, just leave the selection to us and feel assured that you will get only those that will produce best for you. Get your order in the mail today.

Our Root System

A TREE IS NO BETTER THAN ITS ROOTS

ACTUAL PHOTOGRAPH

OUR ROOT SYSTEM

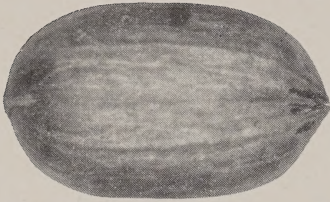

AVERAGE ROOT SYSTEM

The root system we have been able to develop as a result of the knowledge and experience gained from these many years experimentation is your assurance of success in growing pecans. Records supplied by purchasers of our **BETTER ROOTED** trees show that 90% or more, of the trees have lived, grown satisfactorily and produced profitable crops of fine paper shell pecans when properly planted and given reasonable care and attention. We guarantee every tree we sell.

We honestly believe that our **LATERAL** root system enables us to furnish you with trees that will live, grow, and produce better than trees supplied by other nurseries.

**OUR TREES ARE ACCLIMATED AND ADAPTED TO YOUR
LOCALITY**

PECANS

PRICES OF STUART
on Page 5

We Have This Variety In All Sizes
Up To 16 Feet

STUART

The Stuart is a leading pecan, safely grown in more sections of the country than any other. They will grow successfully on wide ranges of soil and conditions. Good productive land will produce pecans profitably. The nuts are very large, attractive and well filled. It is over 50% kernel. The meat is brittle and full of energy-giving vitamins. The tree is a medium to heavy bearer, hardy, fast growing, scab resistance, and will fill the need of a shade tree around your home or farm. A large number of Stuart trees should be used in every commercial planting.

SUCCESS

The Success is the most popular eastern variety in Texas. It become highly productive with age. Should be planted where it will get enough moisture to fill well. The nut is large and strictly first class, thin shell, cracks well and meat can be taken out in halves. Ripens in mid-season. 38 to 40 nuts to the pound, and is 52% kernel. The kernel is rich and plump. The tree is an early bearer and buds out late in the spring. We recommend planting of the 2-3 ft., 3-4 ft., 4-5 ft., and 5-6 ft. size in a large commercial planting for best results. The Success is a good commercial pecan. It will bring about 25c to 28c on the retail market.

PRICES OF SUCCESS
on Page 5

We have a large supply in all sizes
up to the 7-8 ft. Nothing larger.

PRICES ON MOORE
on Page 5

We have a nice supply of Moore in all
sizes up to the 9-10 ft.

MOORE

The Moore is a very fast growing tree, and an amazing producer. Bears early; bears heavily, and ripens early enough to be one of the first on the market. This pecan is sometimes neglected because of its size, but no planting is complete without it. The kernel has an excellent flavor and is ideal for home use. 67 nuts to the pound, but will prove profitable to all who try it. All pecans can be substituted for meat in our diets. Plant now and help supply your family with needed food and extra money.

**Our Trees Are Graded Separately By Hand Assuring You a Grade A
Plant In Every Respect**

PECANS Continued

SCHLEY

The Schley is unsurpassed in quality and in flavor. It is an ideal fast growing tree with beautiful foliage. It is most popular with all pecan lovers. Nuts are extra large, about 50 to the pound. Fully 60% kernel. For profit and production use the Schley. It is very thin shell and attractive in every way.

We have a full supply in the 2-3 ft., 3-4 ft., 4-5 ft., 5-6 ft. 6-7 ft. and the 7-8 ft. Any of these sizes will offer you a good live and profitable orchard.

PRICES ON SCHLEY
On Page 5

PRICES ON MONEY-MAKER
On Page 5

MONEY - MAKER

The Money-Maker is especially suited to planting in the Northern ranges of the area. Medium size, plump kernel, fair quality. About 46% kernel. Offers you a variety in shape and size.

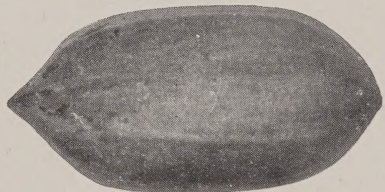

We have an unlimited number of trees in 2-3 ft., 3-4 ft., 4-5 ft., 5-6 ft., 6-7 ft., 7-8 ft., 8-9 ft. and 9-10 ft. size.

DELMAS

The Delmas is a very vigorous growing tree and one of the best for shade purposes. It is productive with age and has been very profitable because of its large size, nice shape, and attractiveness. Large nut, 40 to 45 per pound. 48% kernel This variety is used in landscaping.

You can get the Delmas in all sizes up to the 9-10 ft.

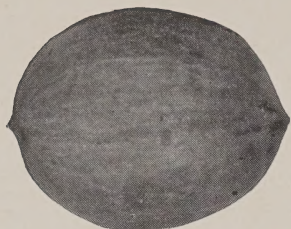

The Stuart, Success, Moore, Schley, Money-Maker and Delmas are all good eastern varieties, and should be used in East Texas, Louisiana, and Arkansas.

PRICES ON DELMAS
On Page 5

Our Trees Are Dug By Hand to Preserve the Root System

PECANS Continued

BURKETT

The Burkett is one of the best western varieties. It is large—about 40 to the pound. It has a very thin shell with 56% kernel; easily identified by public. Scab resistant in the West. A good pecan for the west, and also does well on high ground in East Texas. It is a heavy producer and comes into bearing at an early age.

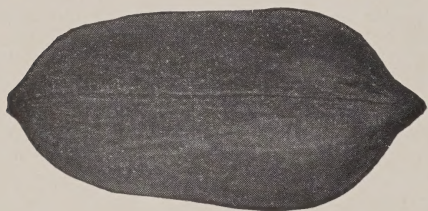

Prices on the Burkett are the same as on page 5. We can supply you with the 2-3 ft., 3-4 ft., 4-5 ft. and 5-6 ft. Order now so your trees will be ready to grow in the Spring.

WESTERN SCHLEY

The Western Schley is very similar to the Eastern Schley, except it thrives better in the drier climate and higher altitudes of the West. It bears early and is a heavy producer. The nuts are large with a very thin shell. 60% kernel. It is a healthy grower. A good yard tree.

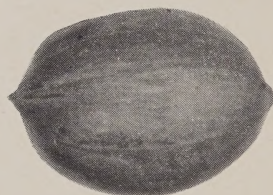

Prices on Western Schley on Page 5. We have the 2-3 ft., 3-4 ft., 4-5 ft., and 5-6 ft. only in this variety.

OKLAHOMA

The Oklahoma originated in Ardmore, Oklahoma, and is well adapted to the State of Oklahoma and West Texas. It is a large nut with the shape of the Delmas. Thin shell; 40 to the pound. One of the heaviest producers we ever saw. Matures rather late, and is 46% kernel.

The prices of Oklahoma are on Page 5, and we have them on hand in all sizes up to the 9-10 ft.

HALBERT

The Halbert bears early and heavy. Medium size nut; thin shell; excellent flavor. A good tree for black, waxy land. Young trees inclined to be crooked, but will grow straight within a few years. Should not be set in Mississippi, Louisiana, East Texas or Eastern Oklahoma. 61% kernel.

The prices are on page 5. We have them in the smaller sizes only—2-3 ft., 3-4 ft., 4-5 ft., and 5-6 ft.

OUR NURSERY IS RELIABLE—33 YEARS IN BUSINESS

PECANS Continued

TEXAS PROLIFIC

This is a good western variety and should be in every planting. It is a large size nut; shell medium thick. The kernel is rich, sweet and plump. It is a heavy producer. 56% kernel. prices below:

We have this variety in 2-3 ft., 3-4 ft., and 4-5 ft. only.

MEYHAN *Mahan (?)*

The biggest pecan grown. Looks like Western Schley, except much larger. This is an Eastern variety. A very vigorous growing tree with splendid long slender nuts. It is a first class pecan with a richly flavored kernel. The nut is about 2½ inches long—averages about 31 nuts to the pound. Luxuriantly foliated shade tree anywhere.

In 2-3 ft., 3-4 ft., 4-5 ft. and 5-6 ft.

SQUIRREL'S DELIGHT

Western variety. Early and heavy producer. Large—50 per pound. Medium thick shell. 56% kernel. Excellent flavor. Larger than Texas Prolific and more scab resistant. Extra early ripener, and should do well in Oklahoma, in early fall frost districts. A splendid variety. Large, showy nut, and the earliest good seller on the market. Prices below.

Have 2-3 ft., 3-4 ft., and 4-5 ft.

VANDEMON *Van Deman (?)*

One of the heaviest bearers of all varieties. Nuts about size of Texas Prolific. A good Polenizer.

Size 2-3 ft., 3-4 ft., 4-5 ft., 5-6 ft., 6-7 ft., and 8-10 ft.

We grow 14 varieties of pecan trees so every person interested in pecans can find several that are well adapted to his locality and conditions.

Instructions For Planting Pecan and Walnut Trees

For a large commercial planting we recommend the 3-4 ft., 4-5 ft., 5-6 ft., and the 6-7 ft. trees. They are ideal for any type of planting.

Pecan and Walnut trees should be planted 50 feet apart, 16 trees to the acre. This planting should be done from November through March. The holes for a lateral rooted tree should be from 3 to 4 feet across and about as deep. The important thing is to give the roots ample room for spreading to their original and natural position. Accurate measurement and regular location of trees will give you a uniform appearance and a very attractive orchard. Pecans and walnuts will thrive on any type of productive soil.

Plant more than one variety. Two or more varieties will insure you against the loss of a crop in case weather conditions are unfavorable for pollination at blooming time.

PEACHES

MAY RIPENERS

MAYFLOWER—A “red-over-all” peach; handsome, splendid quality. Should be in every home orchard. sells readily on the market. Ripens in May.

EARLY WHEELER—Sometimes known as the Red Bird cling. Large fruit, clingstone, beautiful, clear creamy-white. Ripens last of May and first of June.

JUNE RIPENERS

ARP BEAUTY—Yellow, with bright red blush; firm, juicy an excellent peach of unusually good flavor; semi-cling. Ripens June first.

MAMIE ROSS—Large, white, cling peach; red cheek. Nice large fruit that markets early and usually brings a good price. Ripens June 5th to 15th.

BELLE OF GEORGIA—Freestone, white flesh, red cheeked; very large and firm. Excellent flavor. Ripens latter part June.

HALE HAVEN—Freestone, tough skin, very highly colored and well adapted to large commercial plantings. Tree vigorous, hardy; fruit large; good shipper. Ripens about two weeks earlier than Elbertas.

EARLY ELBERTA—Freestone, clear yellow with blush; fine grained and sweet. Tree a strong grower; ripens about one week earlier than Elberta.

JULY RIPENERS

J. H. HALE—Large; yellow, overlaid with bright carmine. flesh, deep yellow; firm, fined grained; delicious flavor; freestone. Ripens in July.

ELBERTA—Most widely known of all peaches. Very attractive appearance; large; deep yellow, splashed crimson; perfect freestone. Trees vigorous, highly productive. Ripens July 5th to 20th.

CHINESE CLING—Skin cream with short fuzz. Mottlings of dull red, covering one-third to one-half of surface next to stem. Flesh white with little red at surface next to seed. Tender and very juicy.

Prices on

Our Famous Peaches

FAIR'S BEAUTY—This is a very delicious variety, splendid for eating direct from the tree. There is no other peach as good for canning. It is yellow; semi-cling; large, to extra large. Ripens June 15th to July 4th.

The Fair's Beauty brings tip-top market prices because of its high quality and early ripening date. There is no other person who has the authority to grow this peach tree for sale. Trade Mark No. 274380.

GOLDEN BEAUTY—This is a large, yellow freestone, with beautiful red cheek. It ripens from June 20th to 25th, three weeks earlier than Elbertas. We have tested this peach for 18 years and are thoroughly convinced that it is one of the very best early ripening yellow freestone peaches. It is excellent for market and shipping. Trade Mark No. 274836.

Supply You With Fruit From MAY UNTIL OCTOBER

AUGUST RIPENERS

AUGBERT—A superb freestone, similar to Elberta, but in many respects superior. Tree vigorous, prolific; very valuable. Ripens in August.

OLD MIXON CLING—Large round; white with distinct red blush; flesh, white next to seed; firm; excellent quality. Ripens in August.

RED INDIAN—Old fashioned Indian Peach that is so good to eat; splendid for pickling and preserving. If you want the best peach in the world for preserving, get the Indian Peach. Ripens in August.

LEMON CLING—Medium size; yellow meat; clingstone. Extra well suited for sweet pickles. Ripens in August.

SEPTEMBER RIPENERS

SEPTEMBER ELBERTA—A wonderful, yellow, freestone peach with delicious flavor. It is a good peach for the late market. ships well. Ripens in September.

OCTOBER RIPENERS

STINSON OCTOBER—One of the best late peaches. Large oblong; white, red cheek; good flavor; clingstone. Ripens in October.

Our peach trees are grown from buds carefully selected from early bearing trees that are true to name. Why take the risk with others, when we guarantee every tree sold to be just what you order.

Stubenrauch Peaches

These Peaches are very popular because they are frost resistant, vigorous and have fine quality of fruit. Mr. J. W. Stubenrauch of Mexia, Texas, was awarded a medal for the great work that he did in breeding these peaches.

FRANK—Clingstone. One of our best peaches. Ripens in August 10th to 15th. Good flavor; large yellow peach, that always demands a good price. Some of Mr. Stubenrauch original trees have produced continuously for 37 years without the loss of a crop. Bears very young; has good crop at 2 years old. One of the best for home and market use.

TENA—Large; Ripens August 1st to 10th; freestone, yellow and red meat, showing traces of Indian blood; extra good for canning. The high-class yellow freestone beats the Elberta to market.

BARBARA—Freestone; Ripens August 15th to 30th; a Bell October and Elberta Cross; round, large; excellent quality; extra fine for canning. It, as the other Stubenrauch peaches, is frost resistant.

PEARS

Pears to eat, and Pears to can. We must grow our own food to win the war

DOUGLAS

Our Douglas pear is one of the most famous for its early and heavy bearing. The fruit is large, slightly oblong in shape, creamy-white with red cheek. Douglas is one of the best eating pears on the market and is sold at fancy prices. Good to eat right off the trees.

BARTLETT

Everyone is acquainted with this large yellow pear. Fruit is very rich and highly aromatic. Trees grow dense and of even conical shape. Very popular. Ripens in August.

LE CONTE

Large; pyriform; smooth; pale yellow. Good quality when properly ripened. Begins to bear when five years old. Ripens July 20 to last of August.

CHINESE SAND

Called "Pineapple Pear." Valuable for canning. Flesh coarse, about the quality of Kieffer. Tree good grower; not subject to blight. Ripens in Aug. Best suited to that section within 100 to 150 miles of Gulf Coast.

GARBER

Fruit large, to very large; skin yellow with light brown cheek. Fine for cooking. Ripens in late Sept.

KIEFFER

Best variety for the Southwest. Will bear very young. The tree is vigorous and very prolific. The fruit is very large; yellow with brown cheeks. The Garber and Kieffer are very much alike. Ripens in Oct.

PLUMS

Pleasure and profit from plums. They are beautiful, delicious, and easy to sell.

SIX WEEKS—Earliest of all plums. Large; oblong; bright red; flesh pink; seed small. Ripens May 20th to June 1st.

METHLEY—Handsome tree; fruit large, golden red. It is a very good producer. Ripens May 25th.

BRUCE—Very red and productive. It is a good plum for commercial use. It is well suited to North Texas, the Panhandle and Oklahoma. Ripens about June 1st.

RED JUNE—The skin, purplish red; the flesh, yellow. It is very firm; somewhat coarse-grained. Very delicious for table use. Ripens about June 5th.

AMERICAN—Tree very thrifty, symmetrical, spreading, and will produce successfully anywhere. It fruits very young, always having a heavy crop. This wonderful plum should be in every orchard. It is a golden yellow with red cheek. Ripens about June 15th to 20th.

GOLD—Nearly transparent; golden yellow; wide range; sure bearer. It is very similar to the American but larger and sweeter. Ripens the last of June to 1st of July.

BURBANK—This plum is extremely popular in all sections. It is very large, richly colored, red mottled, dotted with yellow, and a heavy bearer. Ripens in July.

DAMSON—This is the old-fashioned blue Damson. Known for the fine jelly and preserves it makes. Ripens in late summer.

FIGS

Our Fig Trees have delicious fruit on them the first year. A few of these trees will supply you with all the figs your family will need for home use.

TEXAS EVERBEARING

This is a wonderful new fig—one that you should by all means include in your yard planting. It bears very young, and is prolific and a good grower.

CELESTIAL

This is the little blue fig that is so popular. It is very sweet and hardy. Ripens in July.

BROWN TURKEY

It is a large, brownish-purple, and sweet fruit. Hardier than the Magnolia. Ripens about the last of June to 15th of July.

MAGNOLIA

The Magnolia produces a large brownish fruit that is rich and sweet. It will bear the first year and ripens from June until frost. These are ideal for home use.

"PLANT EARLY FOR BEST RESULTS—BETWEEN NOVEMBER AND APRIL"

BERRIES

AUSTIN DEWBERRY

Probably the best commercial variety for Central and North Texas. Very large, fine flavor and especially good for jams and jellies. A vigorous grower; very prolific. Ripens in May and June

AUSTIN THORNLESS—Same as Austin, except thornless. Same price as Boysen Berry.

BOYSEN BERRIES

This berry looks like a Youngberry and has very similar flavor. Fruit is very large. Ripens in June.

MCDONALD BLACKBERRY

One of the best blackberries. It is very hardy and produces heavy.

YOUNG BERRY

A wonderful berry. Produced by crossing the Loganberry and the Dewberry. An exceptionally heavy producer. Berries dark wine red, of extraordinary flavor, tender, juicy and rich, with no hard core.

YOUNG BERRY THORNLESS—Same as Young Berry, except thornless. Same price as Boysen Berry.

DALLAS BLACKBERRY

Very vigorous. Fruit large, black, firm, juicy, sweet. Mid-season ripener.

GRAPES

FOUR EXCEPTIONALLY GOOD VARIETIES

Every home needs at least 24 grape vines Or an average of 4 grape vines per member of the family, in order to have an adequate supply for jelly, jam and juice. You will be happy to have grapes for decorations and center-pieces for the dining table. Grapes will add much to the beauty of your back yard or fence row.

MOORE'S EARLY—Is a very large, early, black; fine quality, good market grape. The vine is very healthy and prolific. Grapes ripen last of May or early June.

CONCORD—This is the best known of all grapes. It is large, black and suited for table or market use. Ripens in July.

NIAGARA—The Niagara is a large, greenish-white, semi-transparent grape of good quality. This grape does well over a wide range of territory. Ripens in mid-season.

CARMAN—One of our favorites. It is very prolific. It is splendid for table or for wine, grape-juice, preserves and jelly. Cluster very large, sometimes weighing two pounds; shouldered, very compact. The grapes are medium size, black with a tough skin. Pulp is meaty, firm and tender when fully ripe. Splendid quality. Ripens in July.

Japan Persimmons

Japan Persimmons are adapted to the South. They thrive in land suited to cotton. The trees are subject to very few diseases and do not require much care. The trees when covered with large persimmons will add much to the beauty of your home.

TANE NASHI—Fruit large, to very large; roundish conical; seedless; color, light orange-red, with firm yellow flesh. Ripens in October.

EUREKA—Medium-size oblate, tomato-shaped fruit. Originated in Texas. It will withstand severe drouth conditions and low temperatures. Ripens in November.

YEMON—Large; rather flat; yellow, with orange flesh; seedless; good flavor and good bearer. The best variety for the market. It ripens late.

- 6 Peach trees. Some that ripen in May, June, July, August and September. Some cling some freestone. All very productive.
- 4 Grape vines selected from the Niagara, Concord, Moores Early and other varieties suited to your locality.
- 2 Apple trees that will save on your fruit bill and help maintain your health.
- 6 Berry plants. Strong, healthy bushes that will produce the first year.
- 3 Plum trees. Selected from standard varieties.
- 2 Fig trees that will be loaded with large rich flavored fruit the first year.
- 2 Pear trees. One for eating and one for canning.

Order at once. Only those orders received first will be filled as we have only enough stock to fill about 5000 orders. Order now and save over five dollars. Every family should have this selection. "Food will win the war and write the peace."

BUY WAR BONDS and STAMPS

OUT THERE, somewhere, in the Solomon Islands, in Australia, in Africa, in India, in England, in Alaska, at Pearl Harbor, in tanks, in planes, and in ships—out there, somewhere, American men and boys are daily risking their lives, in the service of their country. They are fighting, some of them are dying, because they believe in decency, and honor, and democracy; because they despise treachery, and tyranny, and evil. They have a tough job ahead and know it can not be done successfully unless they do their level best—unless they forget all about self. Their morale is high; their courage challenging.

Every day we at home should think of them. It is our job, no matter where we are, to see to it that these fighting men get everything they need without one moment's delay—planes, tanks, ships, guns, and bombs, bullets, and food—to use against the Axis.

We must buy War Bonds and more War Bonds, but that is not enough. Bonds will provide money to build tanks, planes, ships, guns, and make bombs and bullets, but we at home must plant food producing trees and plants in order to provide our fighting men with the food they must have.

There are millions of homes in cities, small towns, and even in the country that have back lots, vacant lots, and other small plots of ground that is not used at all, or that are inadequately used. Every foot of ground that will produce food must produce food or we can lose this war. "Food will win the war and write the peace!" Are you doing your part?

May we suggest that you plant a tree in memory of someone in the armed forces of the nation. If you have a husband, son, brother, sweetheart, or friend that has been called to march to the great call of the nation, plant a tree as a memorial to him. When he returns it will make him happy to know that you remembered. Should fate decree that they shall not return, these trees would grow into beautiful memorials to comfort you in your great loss.
